(54) Title: TAMPON, IN PARTICULAR FOR FEMININE HYGIENE

(57) Abstract: The tampon according to the invention comprises a tampon body and a with-
drawal tape fastened on the tampon body. The withdrawal tape is configured such that its
effective length can be changed preferably before use, but also during use. In particular, the
withdrawal tape is formed with at least one loop or a fold which reduces the effective length
of the withdrawal tape and can be released in order to increase the effective length of the with-
drawal tape. Effective length refers to the extent of the withdrawal tape, measured from the rear
end of the tampon body, which is available for the user to grip.
